Turn SAP Business One data into aha moments!

Data is the heart of every business. It guides decision-making, keeps teams on track, and fosters innovation. Yet companies often find it challenging to efficiently share data with all li of business.

That's where SXP Employee Edition comes in.

Access and explore SAP Business One data with ease.

SXP Employee Edition is a browser-based portal solution for securely accessing, exploring, and analysing SAP Business One data in real-time.

Mobile-friendly and accessible via any standard web browser, SXP empowers teams to work from any device, anywhere.

With its native SAP Business One integration and out-of-the-box dashboards and reports, teams will get up and running quickly for a predictable monthly cost.

What can you achieve with SXP Employee Edition?

Democratise report creation

Give users the ability to customise existing queries and save them as their own, reducing the dependence on IT for custom reports.

Make data-driven decisions

Decision-making requires you to look at data in different ways. Easy-to-use pivot tables, drill-downs, and colorful charts make it easy to get the insights you need for clear decision-making.

Streamline data access

Give staff access to the data they need via a single web-based dashboard instead of logging into SAP Business One.

Boost productivity

On-demand access to the tools and data they need empowers teams to move business forwards without obstacles or delays.

Key features

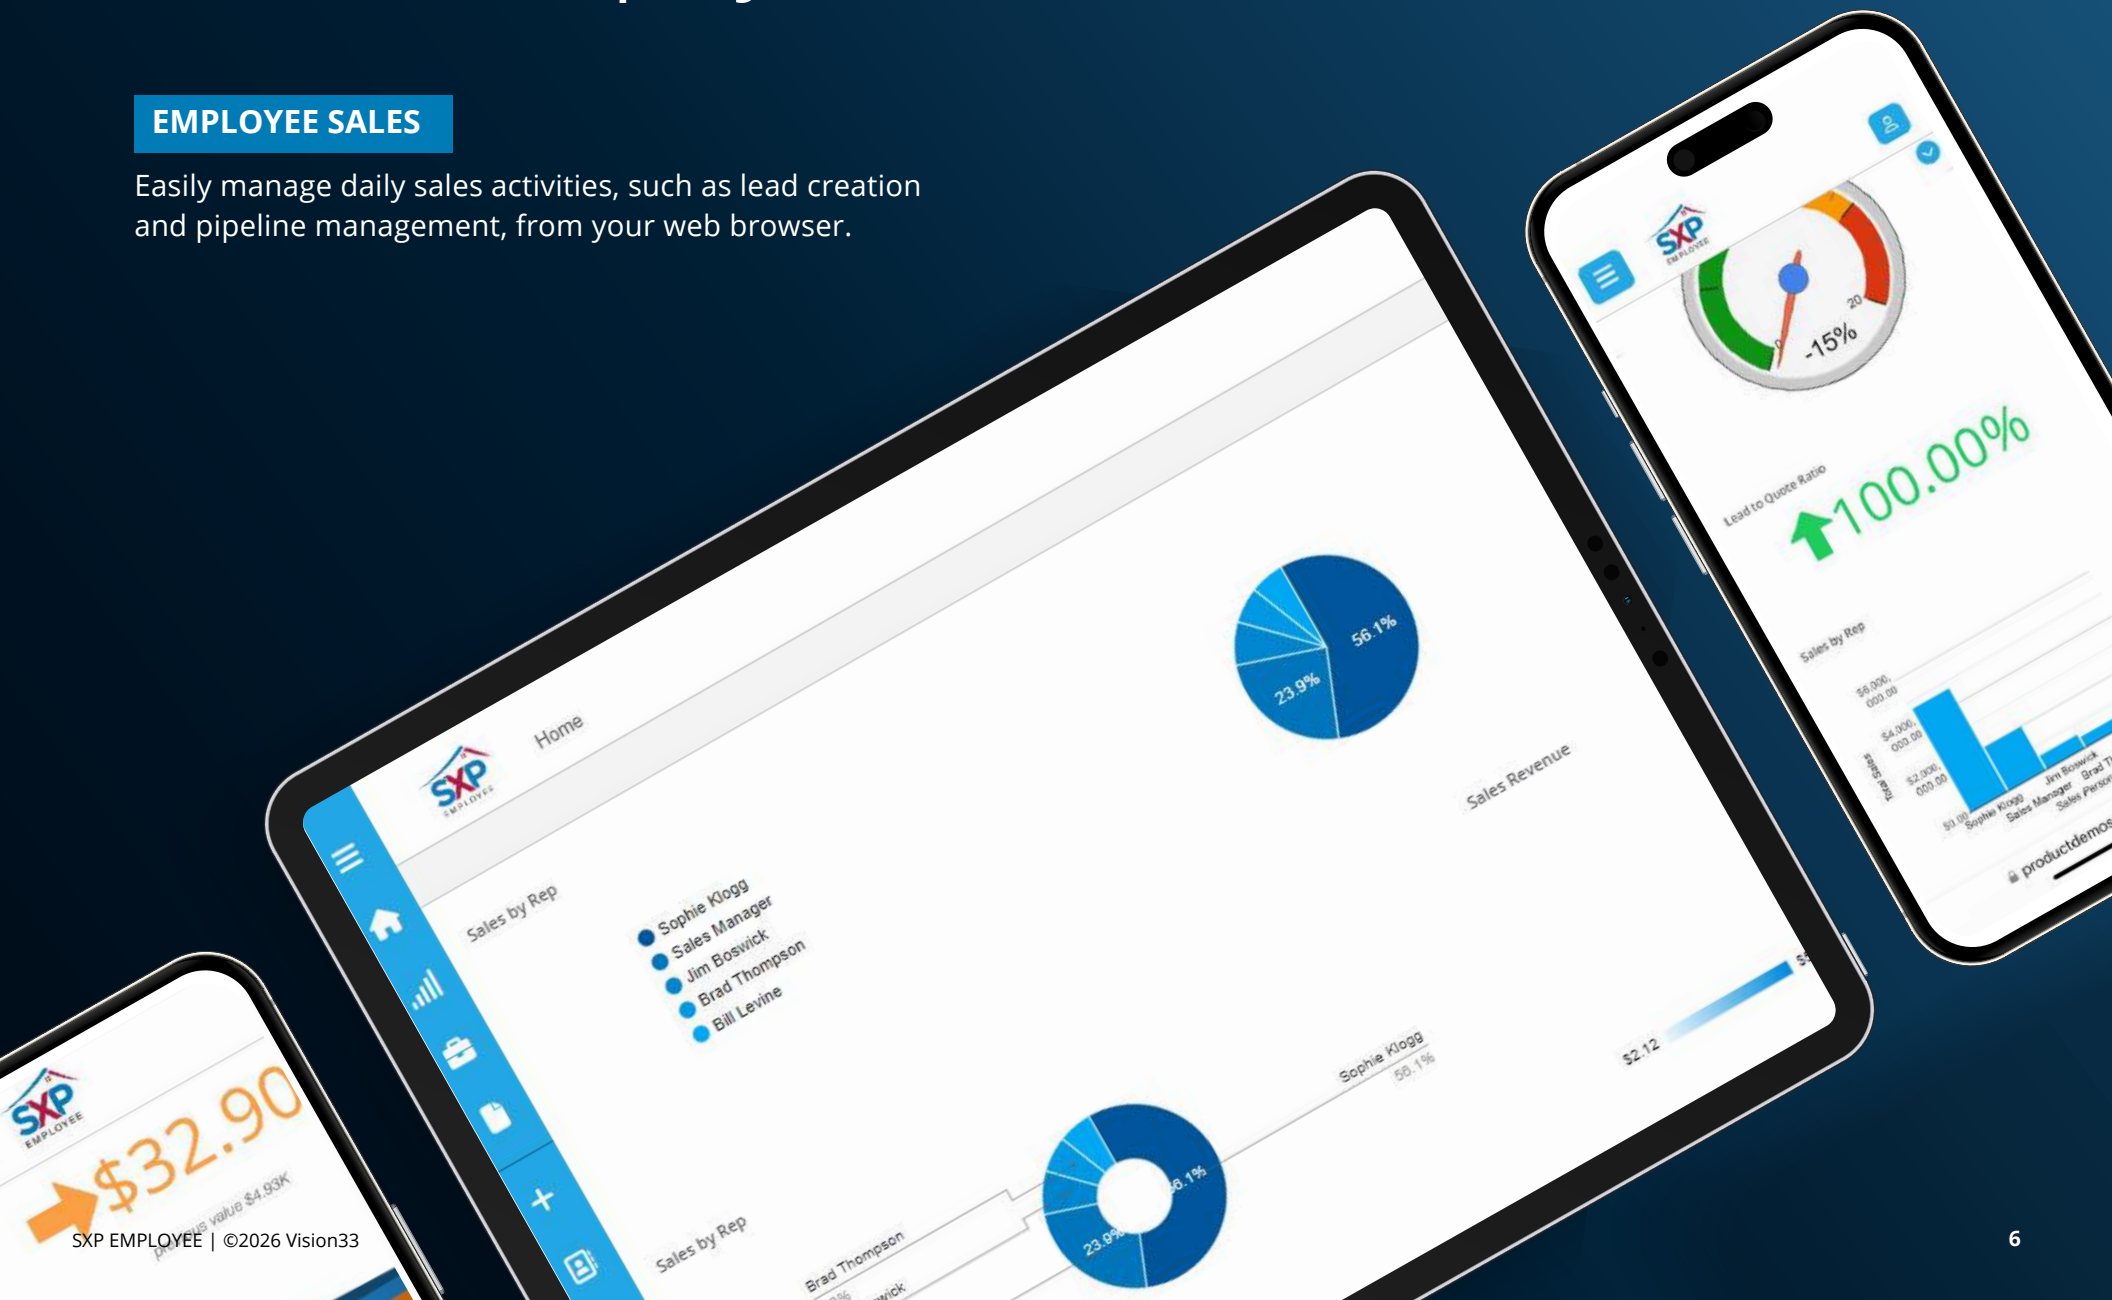

- ✓ Real-time integration with SAP Business One
- ✓ Easily configured within SAP Business On
- ✓ Hosted in AWS Cloud
- ✓ Out-of-the-box dashboards and reports
